ABOUT ME

Python developer with 2+ years of professional experience building backend systems, REST APIs, automation tools, and data pipelines. Skilled in Django, PostgreSQL, and clean server-side logic — with hands-on experience applying Python in an enterprise ERP context. Strong debugging instinct and comfortable working independently in remote-first teams.

WORK EXPERIENCE

Junior Software Engineer · Aktiv Software, Ahmedabad *Jan 2024 – Present*

Full-stack developer handling Python backend development, REST API integrations, database design, automation, and direct client collaboration.

Python & Backend Development

- Rebuilt and optimised a backend module in Python — improved performance by 80% through code refactoring and query optimisation.
- Integrated multiple third-party REST APIs enabling real-time data exchange between external client systems and backend services.
- Wrote Python automation scripts that eliminated repetitive manual tasks, saving significant developer hours weekly.
- Designed schedulers and background jobs in Python for periodic data processing without manual intervention.

Data & Database

- Wrote complex PostgreSQL queries with joins, triggers, and indexing to improve data retrieval performance.
- Built Python data pipelines (Pandas) for processing and visualising business KPIs and revenue dashboards.

ERP Customisation (Odoo)

- Migrated 30+ modules across Odoo v13–v19 with zero compatibility issues — handled model changes, deprecations, and view updates.
- Customised Sales, Purchase, Inventory, Website, and POS modules using Python to match client-specific workflows.
- Developed dynamic QWeb report templates for formatted, on-demand business intelligence.

Client Collaboration

- Worked directly with business consultants and clients to gather requirements, demo features, and iterate on feedback.
- Provided technical training to client teams on newly deployed features for smooth adoption.

ACADEMIC PROJECTS

Car Sensing System — *Python · OpenCV*

Real-time overspeeding detection by analysing video frames — auto-captures image evidence when threshold is exceeded.

Data Analysis Dashboard — *Python · Pandas · Matplotlib*

Analytics dashboard processing sales data and visualising KPIs, trends, and revenue breakdowns via Python pipelines.

Voting System — *Python · PostgreSQL*

Secure digital voting platform with authentication, tamper-resistant storage, and live analytics focused on data integrity.

Voice Recorder Web App — *Django · JavaScript*
Browser-based audio recorder with file storage, session management, and media serving via Django backend.

Quiz Application — *Python · JavaScript*
Multiple-choice quiz engine with real-time scoring — delivered as Python CLI and JavaScript web version.

TECHNICAL SKILLS

Languages	Python · JavaScript · SQL · Java · PHP
Backend	Django · Flask · REST APIs · OOP · Automation · Task Schedulers
Data & DB	PostgreSQL · Pandas · Matplotlib · PGAdmin · Jupyter Notebook
Frontend	HTML5 · CSS3 · Bootstrap · jQuery
ERP / Odoo	Module Dev · QWeb Reports · Version Migration v13–v19
Tools	Git · GitHub · Postman · VS Code · PyCharm

EDUCATION

B.E. Computer Science & Engineering 2022 – 2025
L.J. Institute of Engineering & Technology

Diploma in Computer Engineering 2019 – 2022
Gujarat Technological University

CERTIFICATIONS

- Geoprocessing with Python — ISRO
- Full Stack Web Development — Coursera
- Crash Course on Python — Google
- Python Basics — Infosys Springboard
- Data Structures — Skillzcafe
- Group Discussions — TCS iON

LANGUAGES

- English (Proficient)
- Gujarati (Native)
- Hindi (Proficient)

WHAT I BRING

- Strong debugging instinct — I find root causes, not just symptoms.
- Backend-first mindset — clean, maintainable Python server-side logic.
- Client-facing experience — I translate technical work into plain language.
- Data-aware developer — comfortable writing pipelines, queries, and dashboards.
- Remote-ready — self-directed, async-comfortable, and deadline-driven.
