PROFILE

Python Developer with 2+ years of professional experience building backend systems, REST API integrations, automation solutions, and data-driven applications. Skilled in Python, Flask, PostgreSQL, web development, and AWS deployment. Hands-on experience developing and hosting websites, configuring domains, managing AWS infrastructure, integrating third-party APIs, and building scalable backend solutions. Experienced in database optimization, automation, and working directly with clients to deliver business-focused solutions. Also skilled in AI automation, including building LLM-powered apps and AI agents with n8n, APIs, and RAG workflows.

WORK EXPERIENCE

Trainee · (Aktiv Software, Ahmedabad)

Jan 2024 – Jul 2024

Completed a 6-month training program covering Python fundamentals, backend development practices, and internal tools before converting to a full-time role.

Junior Software Engineer · (Aktiv Software, Ahmedabad)

Jul 2024 – Present

Python backend developer focused on REST API integrations, database design, and automation, collaborating directly with clients to deliver scalable business solutions.

Python & Backend Development

- Rebuilt and optimized a backend module in Python — improved performance by 80% through code refactoring and query optimization.
- Integrated multiple third-party REST APIs enabling real-time data exchange between external client systems and backend services.
- Wrote Python automation scripts that eliminated repetitive manual tasks, saving developer hours weekly.
- Designed schedulers and background jobs in Python for periodic data processing without manual intervention.

Data & Database

- Wrote complex PostgreSQL queries with joins, triggers, and indexing to improve data retrieval performance.
- Built Python data pipelines (Pandas) for processing and visualising business KPIs and revenue dashboards.

Client Collaboration

- Worked directly with business consultants and clients to gather requirements, demo features, and iterate on feedback.
- Provided technical training to client teams on newly deployed features for smooth adoption.

PROJECT EXPERIENCE

AI Automation & Intelligent Agent Solutions · Python · AI Agents · MCP Server Integration

Developed automation workflows using AI agents and MCP server integrations to connect tools and data sources and improve business productivity.

API Integration & Data Synchronization Platform · Python · REST APIs · PostgreSQL

Built and integrated third-party APIs to enable real-time data exchange, automate workflows, and connect multiple business systems.

Cloud Deployment & Application Management · AWS · Server Management · Deployment

Deployed and managed applications on AWS infrastructure; handled configuration, monitoring, troubleshooting, and production support.

Web Development & AWS Deployment · HTML · CSS · JavaScript · Python · AWS

Developed and deployed websites and web applications, including domain registration and configuration. Hosted applications on AWS infrastructure and handled deployment, server configuration, monitoring, troubleshooting, and basic production management.

End-to-End Odoo ERP Implementation · Odoo · Python · Business Process Consulting

Set up complete Odoo ERP environments for client businesses from the ground up — configuring Sales, Purchase, Inventory, and Accounting modules to match each company's existing workflows. Customised modules, views, and automations based on client-specific business rules, then trained internal teams to operate the system independently.

Client-Specific Module Customisation · Odoo · QWeb · Python

Gathered requirements directly from business stakeholders and translated them into tailored Odoo customisations — adjusting workflows, permissions, and reporting to fit each client's operational structure rather than forcing a one-size-fits-all setup.

TECHNICAL SKILLS

Languages: Python · JavaScript · SQL · Java · PHP

Backend: Flask · REST APIs · OOP · Automation · Task Schedulers

Web Development: HTML5 · CSS3 · Bootstrap · jQuery · Responsive Web Development

Cloud & Deployment: AWS · Application Hosting · Domain & DNS Configuration · Server Management · Deployment · Cloud Fundamentals

Data & Databases: PostgreSQL · Pandas · Matplotlib · PGAdmin · Jupyter Notebook

Tools: Git · GitHub · Postman · VS Code · PyCharm

EDUCATION

B.E. Computer Science & Engineering · L.J. Institute of Engineering & Technology 2022 – 2025

Diploma in Computer Engineering · Gujarat Technological University 2019 – 2022

CERTIFICATIONS & LANGUAGES

Certifications

- AI Automation: Build LLM Apps & AI Agents with n8n & APIs.
- AWS Training and Certification (AWS)
- Geoprocessing with Python (ISRO)
- Full Stack Web Development (Coursera)

Languages

English (Proficient) · Gujarati (Native) · Hindi (Proficient)

WHAT I BRING

- Strong debugging instinct — I find root causes, not just symptoms.
- Backend-first mindset — clean, maintainable Python server-side logic.
- Client-facing experience — I translate technical work into plain language.
- Data-aware developer — comfortable writing pipelines, queries, and dashboards.
- Remote-ready — self-directed, async-comfortable, and deadline-driven.
